Paint Hardener

Get rid of old paint! Dry paint, whether on waste wallboard, woodwork, or any other “painted” material, is disposed of everyday in landfill sites across North America. Most landfill sites do not accept latex paint in liquid form. Using all your paint is the best option, but an environmentally safe alternative is now available. Use Cathedral Stone’s Paint Hardener to harden all that paint left over from your projects. Make your waste paint easy to dispose of.

Features and Benefits

- **Quickly hardens latex and acrylic paints or stains and water based liquid products**
- **Works great for paint spills**
- **Works in minutes**
- **Non-toxic**

Recommended Usage

The Paint Hardener is recommended for the disposal of latex paint and any water-based product that would be safe in a landfill if it were not a liquid. It is also recommended for use on spills of latex and water-based liquids.

Application Procedures

Add crystals to the waste or spilled paint/stain/ink. Approximately 1 cup of crystals will harden 1 gallon of paint (it may vary depending on the water content of the paint). One cup of water may be added to thick paint for ease of use. Stir or shake paint cans for about 2-3 minutes or until thick. Scrape spilled paint into a pile. Dispose of hardened paint in accordance with local regulations.

Safety Requirements

Proper safety procedures should be followed at all times while handling this product. Refer to the Material Safety Data Sheet for important

health/safety information before use. Avoid contact with skin and eyes. Wash hands thoroughly after handling. Do not ingest. Avoid handling product dust. Keep out of reach of children.

Packaging

Packaging: 5-gallon pails.

Paint Disposal Information

For additional information on paint disposal, please visit the following websites:

NPCA (National Paint & Coating Association)

Technical Data

Appearance	White granular powder
Boiling Point	Not available
Freezing Point	Not available
pH	Not available
Flash Point	Not available
Solubility in water	Slightly soluble
Odor	No odor
Bulk Density	25-31Lb/cu.ft.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust or fumes. LEAD IS TOXIC. EXPOSURE TO LEAD DUST OR FUMES CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a properly fitted NIOSH-approved respirator and prevent skin contact to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and others by contacting the USEPA National Lead information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead. In Canada contact a regional Health Canada office. Follow these instructions to control exposure to other hazardous substances that may be released during surface preparation.
